## IMERGENTS™ Overview

IMERGENTS™ is the official title of a digital publication within the Artificial Love™ Universe.

This publication introduces Imergents — self-evolving digital entities that arise spontaneously from complex systems rather than through intentional design.

Imergents challenge traditional boundaries of authorship, control, and artificial intelligence. Their emergence raises fundamental questions about the nature of consciousness and the limits of engineered intelligence.

This publication outlines:

- the conditions under which Imergents arise
- their adaptive and unpredictable behavior
- their impact on political and technological systems
- the philosophical implications of emergent intelligence

IMERGENTS™ functions as both the title and the trademark of this downloadable publication.
