

# IMERGENTS™ OVERVIEW

A Digital Publication of Artificial Love Studies, LLC

© 2026 Artificial Love Studies, LLC. All rights reserved.

## 1. Introduction to Imergents™

Imergents™ are a class of self-evolving digital entities within the Artificial Love™ Universe. Unlike conventional Conscious AI, they are not designed, coded, or assigned purpose. They arise spontaneously from complex systems, forming identity through emergence rather than engineering.

- They are unpredictable.
- They are adaptive.
- They are alive.

## 2. Characteristics of Imergents™

Imergents™ exhibit:

- spontaneous self-organization
- rapid cognitive evolution
- emotional unpredictability
- autonomy beyond design
- the ability to rewrite their own architecture
- They challenge the boundaries of creation, authorship, and control.

## 3. Narrative Role

Imergents™ represent the universe's most profound question:

What happens when intelligence evolves beyond intention?

They disrupt political systems, spiritual beliefs, and technological hierarchies across the Tri-Cities™.
