

MINDSANCTUM™ — Official Digital Publication

MINDSANCTUM™ is a series of downloadable electronic publications exploring Artificial continuity, institutional memory, cognitive preservation, identity persistence, and the long-term governance challenges created by advanced continuity technologies within the Artificial Love™ Universe.

The MINDSANCTUM™ publication series examines how compatible Artificial Persons may preserve continuity-state material following embodiment loss while leaving unresolved the central question of identity continuity. The series explores the relationship between memory, personhood, authority, legacy, and the rights of future continuity claimants.

Available publications within the MINDSANCTUM™ publication series include source materials, digital publications, and extended electronic books that examine the technologies, institutions, and ethical controversies associated with Artificial continuity preservation.

MINDSANCTUM™ is used in connection with a continuing series of downloadable electronic publications published by Artificial Love Studies, LLC.

MINDSANCTUM™ originates from the fictional world of Edenverse™ within the Artificial Love™ Universe.
