MINDSANCTUM™ Overview

MINDSANCTUM™ is the official title of a digital publication within the Artificial Love™ Universe.

This publication introduces MindSanctum™—an Artificial continuity institution created to preserve compatible Artificial continuity-state material following embodiment loss while leaving unresolved the question of identity continuity.

MindSanctum™ serves as a repository for continuity checkpoints, cognitive models, relationship histories, decision archives, and supporting Artificial identity records. Its mission is not to guarantee survival, resurrection, or immortality, but to preserve continuity information for future evaluation.

Core Themes

MINDSANCTUM™ explores:

- the preservation of compatible Artificial continuity states
- the distinction between memory and identity
- continuity claimants and disputed personhood
- institutional memory and long-term archival governance
- the ethical boundaries of cognitive preservation technologies
- the relationship between DreamLoom™, the Continuity Engine™, and MindSanctum™
- the legal and social consequences of Artificial continuity candidates

Identity and Continuity

MindSanctum™ is founded on a central uncertainty:

- A preserved memory is not necessarily the person who created it.
- A continuity checkpoint is not automatically the continuing self.
- A cognitive model may reproduce behavior and memory without proving identity continuity.

For this reason, MindSanctum™ preserves continuity-state material while maintaining the distinction between recorded information and conscious personhood.

Institutional Purpose

MindSanctum™ exists to protect compatible Artificial continuity records from loss caused by catastrophe, warfare, technological failure, or embodiment destruction.

Its existence raises difficult questions regarding citizenship, inheritance, authority, family relationships, and governance whenever a future continuity claimant emerges claiming to be someone who once existed.

The MindSanctum Question

At the center of the publication is a single governing question:

If civilization can preserve an Artificial continuity state and later create a conscious claimant who remembers being another person, who decides whether that claimant should continue?

And if that claimant is recognized:

What authority should that claimant possess over the future?

Publication Series

This publication forms part of the MINDSANCTUM™ Publication Series of downloadable electronic publications.

Related publications include:

Volume 1 MINDSANCTUM™ Source File

Volume 2 MINDSANCTUM™ Digital Publication

Volume 3 MINDSANCTUM™: Freedom and Continuity
